If you are a cochlear implant recipient or family member, you know what an extraordinary impact the technology can make on someone's life. Due to low awareness, only a fraction of people who could benefit have a cochlear implant. Proposed healthcare changes could make access even more difficult.

American Cochlear Implant Alliance is a not-for-profit membership organization created to eliminate barriers to cochlear implantation by focusing on research, advocacy and awareness. Our membership spans scientists and clinicians, adult recipients, parents, and other advocates for access to care.
